

# CoDefence.Flex

**Brief:** to provide a layer of protection between patients, without the expense of moving all the beds.

**Proposal:** a twin curtain featuring a clear, wipeable, sprayable curtain between each bed working in conjunction with the existing associated curtain. This clear curtain would run parallel with the bed and the disposable curtain would pull around that providing full privacy as it does currently.

**Features:**

- Washable
- Fire resistant BS5867 Part2:Type B:2008
- Flexible
- Retains visibility
- Reduces spread of virus between patients
- Fits in with current curtain plan
- Strong eyelets fit to same track as existing
- Seamless - prevents virus trap
