

Amazon fabric

The Amazon fabric is designed for areas where privacy or solar shading is needed. This fabric is 100% polyester and boasts a flame retardant composition to ensure that this fabric is suitable for many applications both commercial and domestic. The dim-out properties of this fabric allow a certain amount of light to penetrate whilst at the same time taking away the glare. Amazon fabric is available in 13 colours and in three widths – 2000mm, 127mm and 89mm. This comprehensive range has the capacity to challenge many larger collections.

shading efficiency

Transmittance is the amount of light and heat transmitted beyond the fabric. The lower the amount, the greater the efficiency.

Block/reflect is the amount of heat and light that is blocked or reflected. The higher the amount, the greater the efficiency.

Absorption is the amount of heat and light absorbed in the fabric. The higher the amount, the lower the efficiency.

Ultraviolet protection illustrates how protective the fabric is against ultraviolet rays. The higher the amount, the greater the effectiveness.

	2000 mm	127 mm	89 mm	Heat Transmittance %	Light Transmittance %	Sun Block %	Ultraviolet Protection %	Shading Co-efficiency %	Heat Reflection %
White				18	16	84	100	25	74
Cream				18	19	81	100	29	70
